

Leena AI for IT

Create the most efficient IT service
desk with an AI assistant

Resolution by channel

How does poor IT support impact your **employees productivity**?

- On average, an employee waits **30.72 hours** for their IT ticket to be resolved.
- Even if the ticket takes only **10 minutes** to resolve, it's **stuck in a queue at the service desk**.
- Working through this low-grade pain every day isn't easy, and as a result, performance and productivity suffer.

It's not the IT team's fault either.

Here's how they spend their time:

- ✓ These service requests range from **access issues, troubleshooting questions, approval requests, software license requests and high touch issues.**
- ✓ Tickets are also scattered with employees seeking support from their phones, web portal, emails and even the occasional walk up to the desk.

Understanding the **need for AI in IT teams**

Gartner

According to Gartner, AI and automation can save IT organizations an average of **\$1.2 million per year**.

According to Cognizant, **93% of IT leaders** saying that AI is a critical tool for business transformation.

McKinsey & Company

A report by McKinsey estimates that by 2025, AI adoption in IT operations could generate **\$150 billion in annual savings** for the IT industry through improved productivity and reduced downtime.

Introducing

Leena AI **for IT**

AI work assistant for your employees

The WorkLM™ Enterprise

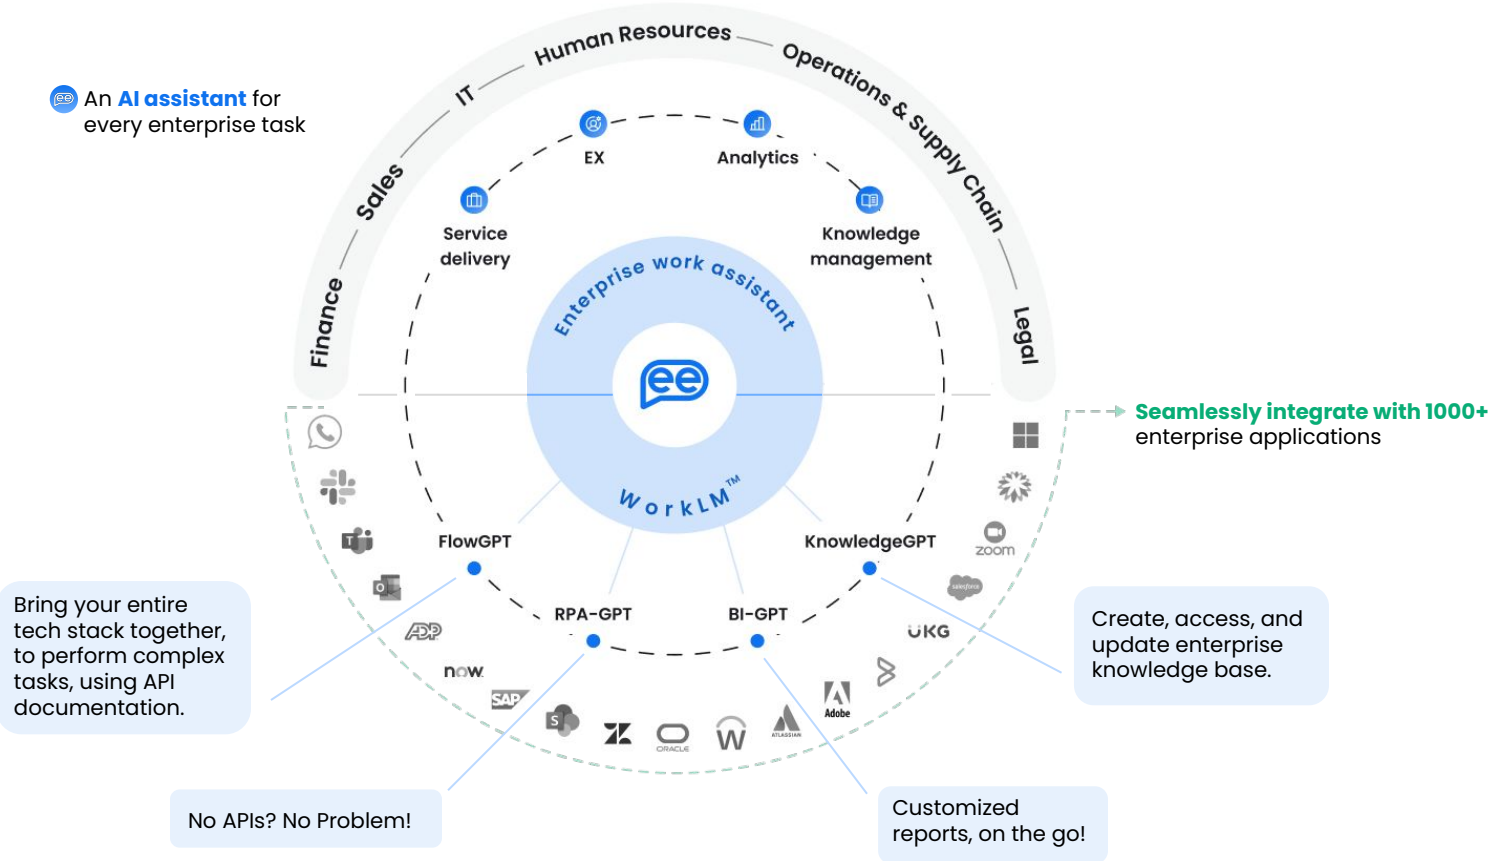

Leena AI **WorkLM™** is focused on taking enterprises into unparalleled levels of productivity & efficiency

-  optimize efficiency
-  streamline processes
-  harness the vast volumes of unstructured data enterprises produce daily

How does it work?

 An **AI assistant** for every enterprise task

WorkLM™

Specifications

✔ Mistral-7B Backbone

The Mistral-7B backbone provides WorkLM™ with an advanced predictive text generation capability, producing human-like responses in given contexts.

✔ 7B Parameters

Parameters in machine learning models denote the model's learning capacity from data. With a substantial 'brain capacity' of 7 billion parameters, WorkLM™ is designed to understand and produce intricate text.

✔ Proprietary Data

The power of WorkLM™ resides in its unique training dataset. This dataset, composed of 2TB of proprietary data, has been carefully collected and curated by Leena AI over the past seven years.

Comprehensive solution for IT teams to transform the way they work

IT Support Automation

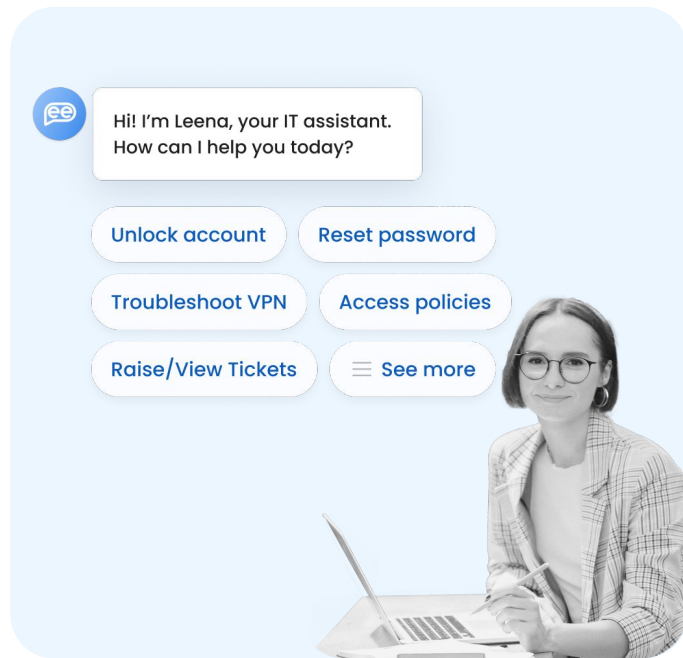

Free up time for your IT team by auto-resolving repetitive IT tickets like service requests, access issues, and common troubleshooting queries.

IT Service Management

Optimize your ITSM processes like incident management, and change management with generative AI and enable your team to deliver better services to employees.

IT Service Desk

Comprehensive IT ticket management solution for complex, high-touch issues that require expert support.

IT support, reinvented with **WorkLM™**

**Raised and
Resolved in
Seconds**

.....> ***Identity and Access Management***

Leena AI can reset passwords, unlock accounts, provision software, handle approvals and even recommend alternative tools.

.....> ***Troubleshooting queries***

The work assistant can offer instant, step-by-step support for resolving common hardware and system-level issues and provide help on chat for troubleshooting third-party software issues

.....> ***IT Onboarding***

Leena AI automatically creates accounts, and licenses and initiates onboarding workflows when a new employee is added to the HRMS.

Broaden ITSM capabilities with an **AI Assistant**

Hi Sean! I've detected a significant increase in network traffic to our main server. Shall I raise a ticket?

Yes

No

.....> *Provide proactive problem management*

Leena AI learns from large volumes of IT system logs, network traffic, and other data sources to learn the normal behavior of IT systems and generates alerts or notifications when unusual activities or potential issues are detected.

.....> *Anticipate future additions to the service catalog*

The work assistant can enhance the service catalog by automatically generating and updating service offerings based on employee requirements, industry best practices, and market trends.

.....> *Extract knowledge from unstructured data*

Leena AI can analyze unstructured data sources such as service desk call recordings, chat transcripts, and user feedback to extract valuable knowledge and insights to refine ITSM processes.

Accelerate your ticket lifecycle

.....> ***Experience precise routing of tickets***

Leena AI understands the intent from employees queries and uses details like employees' role, team, department to assign it to the right expert.

Leverage flawless communication for faster resolution

Employees can track their ticket status, communicate freely with the support agents by adding comments to tickets for more context and even close tickets right from the chat window.

Empower support agents with answers

Assist IT support agents with relevant knowledge base articles from the consolidated knowledge base. They get prompted with answers based on past resolutions and category of the ticket.

The Leena AI Impact

- ✓ **Adaptive Problem-Solving:** With adaptive learning and problem-solving, ticket resolution time can be reduced by up to 60%.
- ✓ **Advanced Automation:** Automate up to 80% of IT support tasks, allowing your IT team to focus on higher-level, strategic initiatives.
- ✓ **Intelligent Resolution:** Increase the First Contact Resolution (FCR) rate to about 75%. This means fewer follow-up tickets and less time wasted on repetitive issues.
- ✓ **Efficient Resource Allocation:** Reduce the overall IT support costs by as much as 30%.

The Leena AI Impact

- ✓ **Empowered Workforce:** Increase overall employee productivity and save millions of work hours annually.
- ✓ **24/7 Intelligent Support:** Deliver round the clock availability, providing immediate, intelligent responses to IT issues anytime, reducing business disruption significantly.
- ✓ **Enhanced Employee Satisfaction:** Increase employee satisfaction with IT services and build a culture of self service that benefits both employees and your IT team.

The impact of **Generative AI** on IT teams

For Leadership

- Faster adoption of new technologies and fast track digital transformation
- Increased cost savings with automation of processes
- Improved risk management and decision making
- Enhanced innovation in developing new solutions

For IT Teams

- Elimination of repetitive IT queries and faster resolution of high touch issues
- Increase in collaboration and efficiency of IT support agents
- Improved system reliability with real time insights and predictive maintenance
- Improved job satisfaction for IT support agents and employee satisfaction with IT team

For Employees

- Boost in employee productivity
- Access to multilingual IT support and quick translation of KB articles
- Increased adoption and use of existing company resources
- Improved onboarding and training experience for new employees

Key Capabilities

Multijurisdictional Compliance

Leena AI's platform offers out-of-the-box, automated adherences to laws in many regions

Data Integrity

Only the data authorized to be used will be accessed. No data will be sent to any partner for processing

Made For The World

Leena AI works in all major languages (including vernacular languages) and offers support everywhere

Highest Participation

Leena AI offers the highest participation rates due to a conversational, and human-like experience

Get Started Quickly

Get started in a few weeks. Quick start. Quicker results.

Best-In-Class Technology

Generative AI coupled with auto-intent and sentiment analysis

Deploy in 100+ languages

Leena AI supports over 100+ languages with the ability to add any new language within 3 weeks from customer requests

Some of the languages currently being used by our customers include:

- | | | |
|--------------|------------|------------|
| ✓ Arabic | ✓ English | ✓ Japanese |
| ✓ Italian | ✓ French | ✓ Kannada |
